Aspiring Computer Science student with programming strengths in Java, Android Studio, Javascript, HTML, and CSS looking to apply my knowledge to the real world.

EDUCATION

Computer Science 09/2019 – present

University of California- San Diego, San Diego, USA

Relevant courses- Intro to OOP, Intro to Discrete Mathematics, Intro to Data Structures, Software Techniques
GPA- 3.7925

SKILLS

Programming

Java	Full
Javascript/HTML/CSS	Professional
React	Professional
Android Studio	Professional

Tools

Git	Professional
Firebase	Professional

PROJECTS

CalorieTracker

- Keeps track of the calories consumed on a per day basis
- Used object-oriented design principles and test-driven development to build full stack web applications.
- Created responsive websites from scratch.
- Support and development of new functionality for already existing projects.
- <https://calorietracking.netlify.app>

EventList

- A simple way to publish events for everyone to see
- Work on bug fixing and improving application performance.
- Design and build advanced applications for the Android platform.

SendLocation

- Sends the specified phone numbers an update of location at a set period of time
- Design and build advanced applications for the Android platform.
- Work on bug fixing and improving application performance.

EXPERIENCE

Referee 09/2015 – 12/2018

California State Soccer Associations, San Diego, United States

- Leadership role controlling competitive games
- Communication skills working with other referees and coaches
- Cycled between Assistant and Center Referee

VOLUNTEERING

Mentor 09/2015 – 02/2018

Science Olympiad, San Diego, USA

- Leadership and mentor role tutoring young adults in Science-related courses.
- Learned to organize and prepare materials for classes.
- Built Communication and Group skills by listening and implementing feedback from students.
- Worked with coaches to create a learning environment catering to the students and optimizing learning opportunities.
